

Lab 1: Oracle Database Basics

Lab 1: Oracle Database Basics

1. Open Toad and connect as a Toad User called SCOTT1 using an oracle account user called scott with a password of tiger.

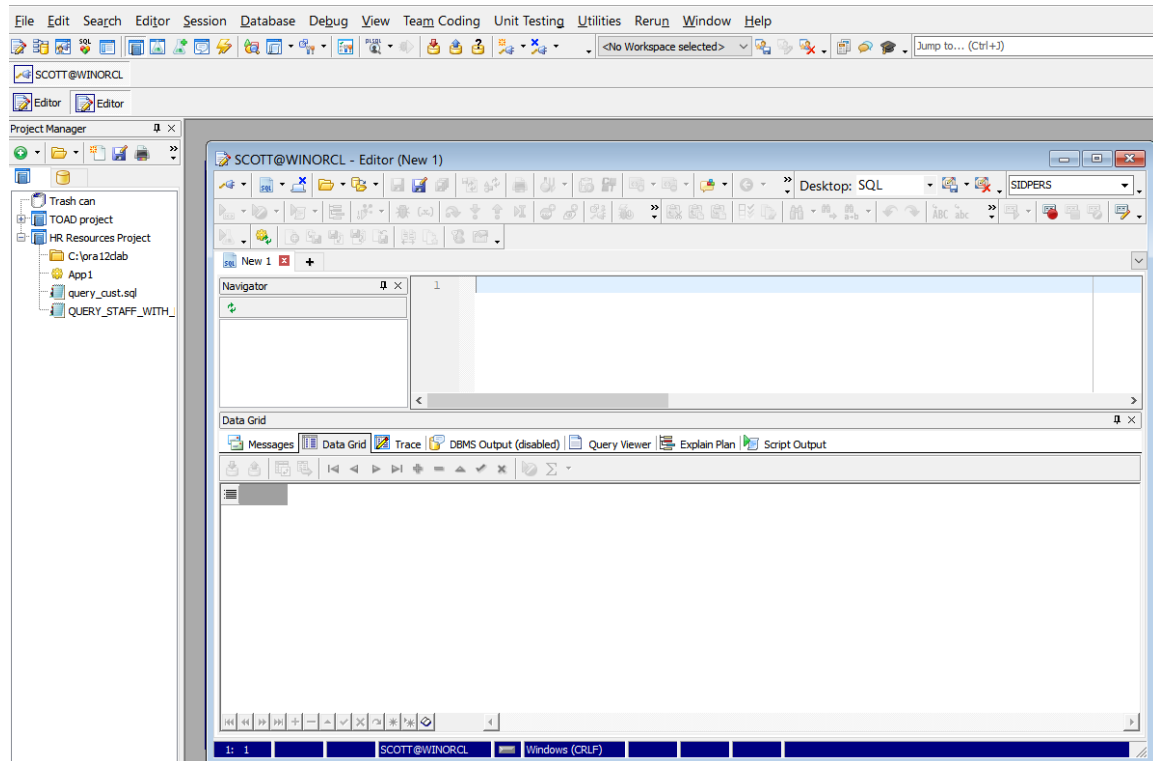

2. Perform the following query.

```
select * From Tab;
```

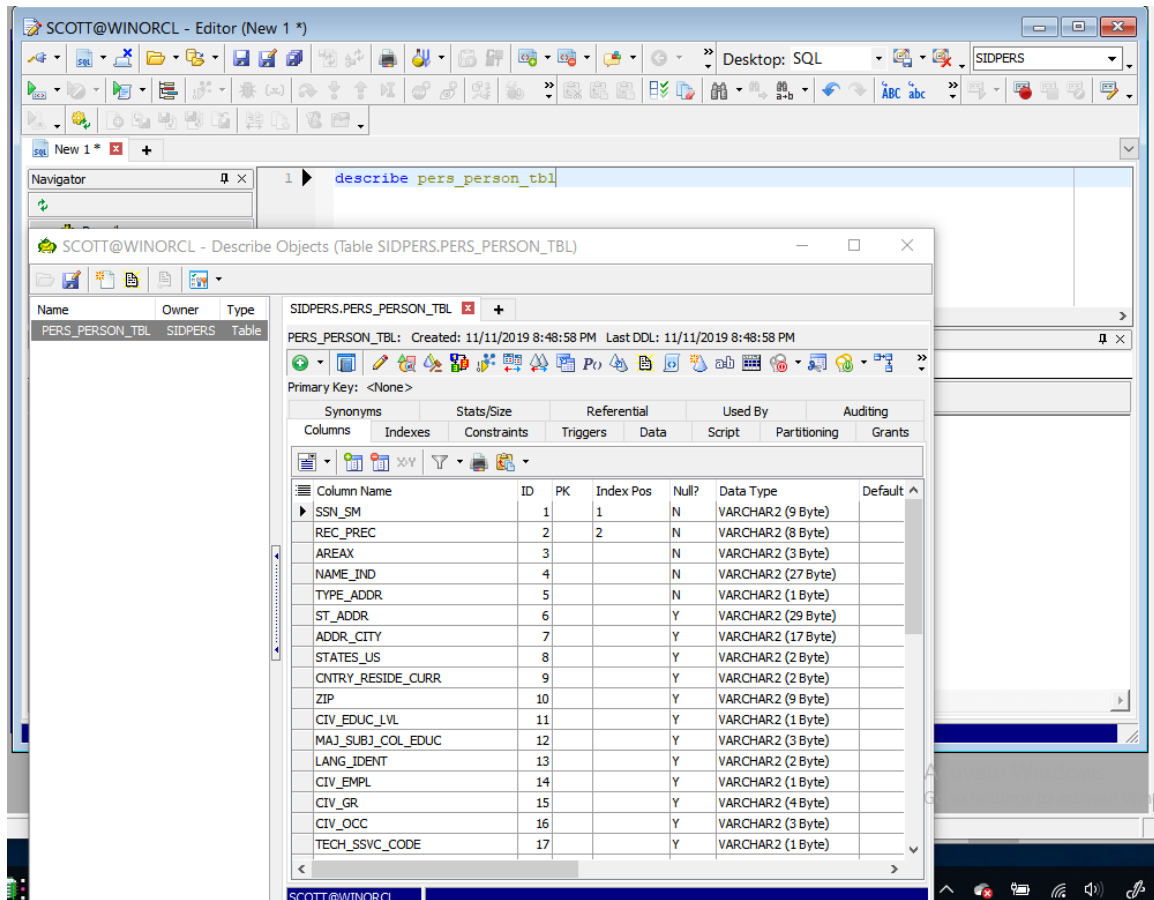

3. Connect as sidpers with a password of password as follows in TOAD.

4. In TOAD and make the connection for sidpers using the Editor Icon

Toad for Oracle expires on 15-October-2020

5. Perform a describe on pers_person_tbl in TOAD

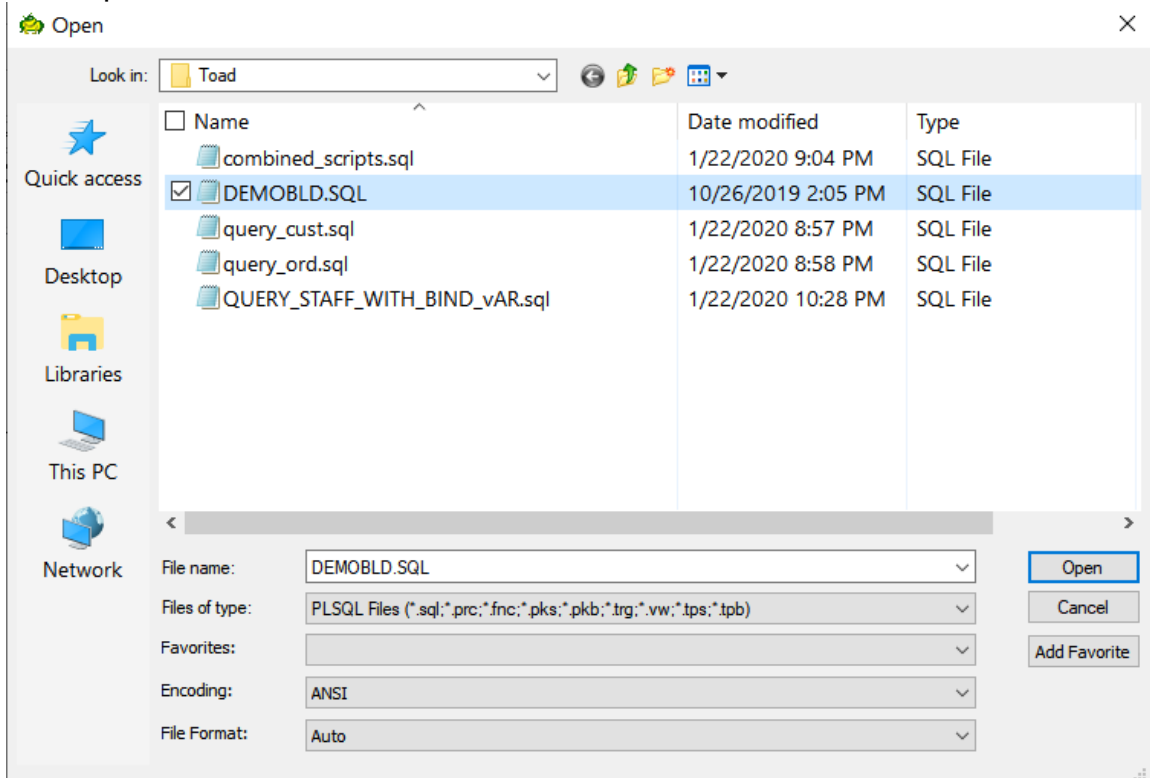

6. Perform a describe on pers_svcmb_r_tbl.

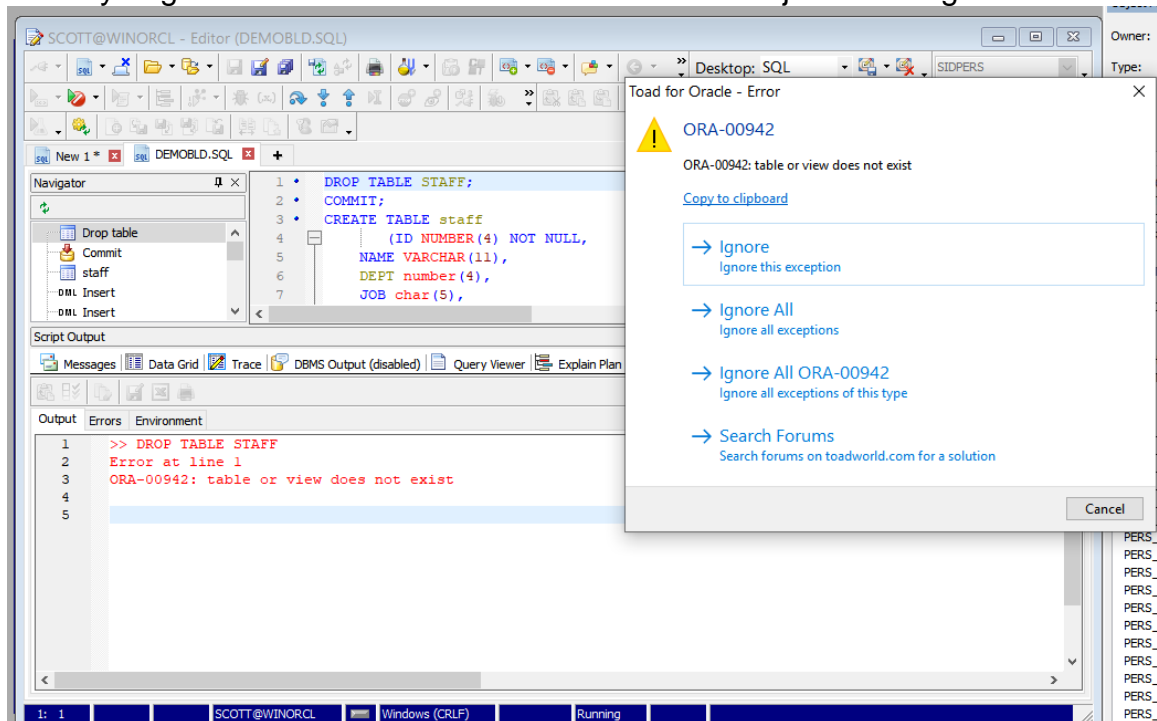

7. In TOAD Editor select all the rows from the Pers_Person_tbl.

8. In TOAD describe the Pers_Unit_Tbl.

9. In TOAD, find a file called demobld.sql as the scott user and run this as a script.:

10. When you get the Toad for Oracle – Error ORA-00942 just select ignore ALL

11. The error occurs because the table being dropped does not exist. This script is creating it.
